

2025 C-SNP Rx Quick Reference Guide

This quick reference tool is intended to help you guide consumers to the right C-SNP plan based on the medications they're taking.

The table of covered drugs shown in this reference guide highlights common medications prescribed to individuals with diabetes, CVD, and CHF, and what tier those drugs are under in the **6 tier formulary**. **All formularies cover the same drugs in 2025**, although drugs may be in a different tier and/or have a different cost-share depending on the formulary and plan.

To view the full list of drugs covered under a particular plan, please refer to the formulary documents found on the Gold Kidney website at goldkidney.com/covered-drugs.
